

system and means for storing audio signals and images, said alarm system and said storage means being mounted within said housing.

11. (amended) The cellular phone of claim <sup>22</sup>~~7~~ [further including] wherein said internal power source comprises battery means [associated with] mounted within said housing, said battery means, supplying power to said alarm system and said audio signal and image storage means.

In claim ~~12~~, line 1, delete "1" and insert -11-- therefor.

In claim 13, line 2, delete "two mode".

#### REMARKS

Responsive to the Office Action dated December 8, 1998, reconsideration and allowance of remaining claims 7, 9, 11-13 and 17-19 is respectfully requested.

Certified copies of the two Korean applications noted by examiner will be forwarded to the Patent and Trademark Office in the near future.

Formal drawings will be submitted when examiner indicates allowable subject matter is present in the application.

The rejection of claims 7, 11, 12 and 13 as being unpatentable over Alpert in view of Dounies is traversed for the reasons to follow.

It first should be noted that Alpert discloses an emergency mobile telephone (digital mobile telephone) device. Mobile communication works by limiting transmitter powers, thus restricting the range of communication to a small region (cell). Outside this region, other transmitters operate independently. The
